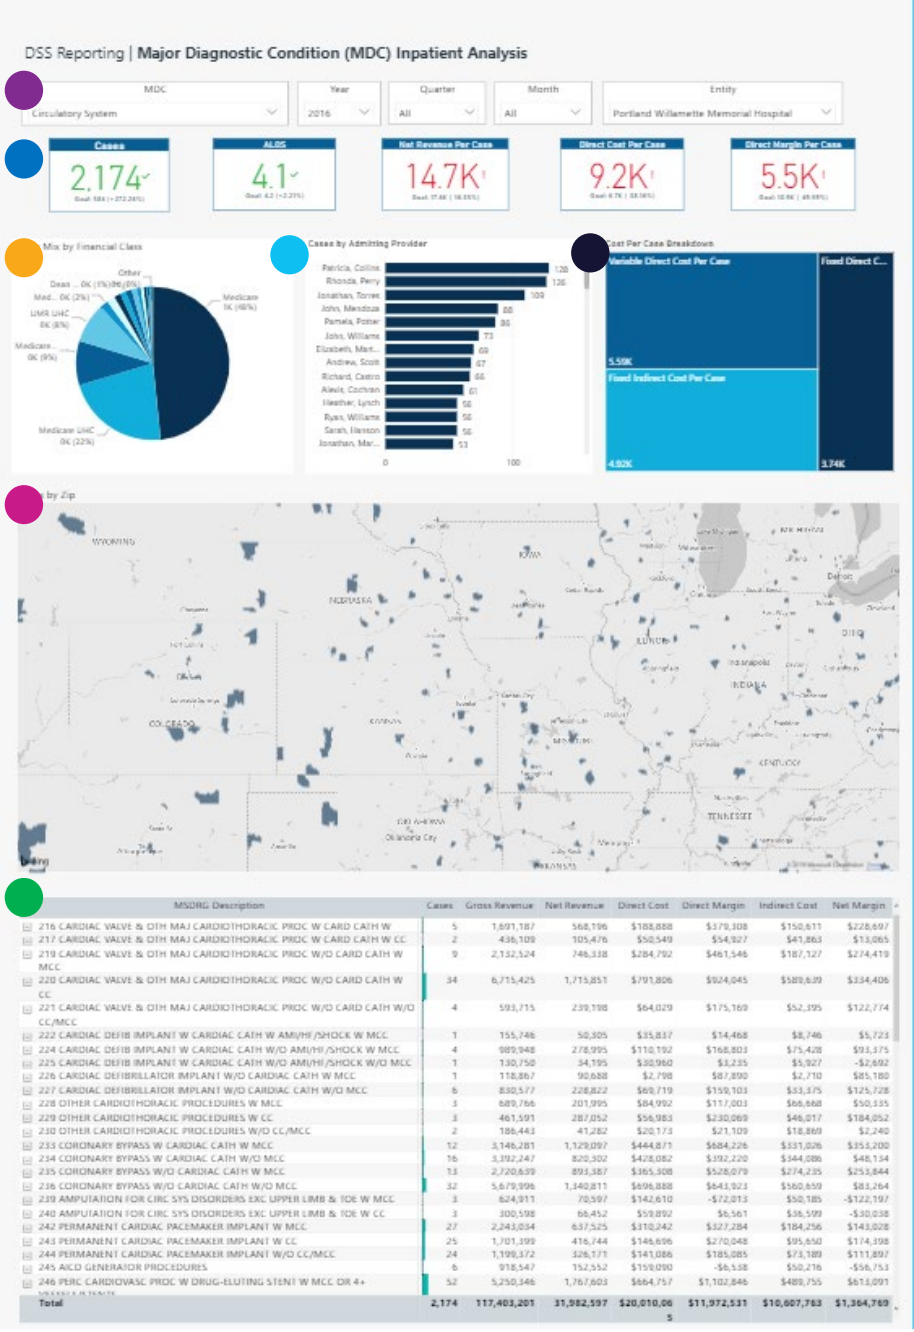
# Lesson 4

**Example #4**

# Major Diagnostic Category Inpatient Analysis

- Selectors to filter based on MDC, timeframes and Entity.
- KPI box visualizations based on a dimension/measure with ability to set goal (previous year) and calculate variance.
- Pie chart illustrating payor mix by financial class.
- Stacked bar chart cases by admitting provider.
- Tree map visualization illustrating gross revenue by DSS Patient Type and drilled to Patient Type.
- Filled map visualization with zipcode set at location and cases set as tooltip.
- Matrix visualization with MDC and drill path to MSDRG as the rows. Multiple key dimensions and measures as the values (displayed as columns).



*In order to utilize this training report you must have MDC filled out in Axiom. This report utilizes MDC short description column.*
