Axiom Capital Planning and
Tracking
Version 2021.2

The Axiom logo consists of the word "AXIOM" in a bold, white, sans-serif font. It is enclosed within a rectangular frame made of two parallel lines, one light blue and one light purple, which are slightly offset from each other.

AXIOM

Import from Capital Tracking to Source System	13

Desired file structures

This document outlines the file format requirements for importing data into Axiom Capital Tracking.

To date, Kaufman Hall has had 100% success in communicating with all of our clients' systems. We vow to never be the weak link in any communications issues. Because of this commitment, we have developed our download procedures to work with multiple file formats. While we would prefer files in a certain format, we will work with whatever you can supply.

▶ Delimited files

Delimited files are acceptable as long as text information is wrapped in quotations. Row 1 may include heading labels. We recommend using a Pipe (|) delimiter instead of a comma, if possible.

▶ Excel files

Excel files are also acceptable. Row1 must be blank or include heading labels.

Remember that these file specifications are those of an "ideal" file. We can work with file structures that are significantly different than the ideal. However, if this is necessary, processing time may be somewhat slower and the time and effort expended in developing and configuring the interface may be more extensive.

NOTE: With the download file, please send tie-out reports for the periods included in the download file. This will allow us to easily verify the accuracy of the download process. Please send related financial statements for ALL download files sent.

Requested information

To implement Axiom Capital Planning and Tracking in the most expeditious manner, as well as to familiarize ourselves with your specific needs and processes, we request that you send us copies of the following materials and information within two weeks of receipt of this packet. Details for each required data source are provided in [Table description data - standard tables](#).

IMPORTANT: A delay in receiving these materials may lead to a delay in the implementation of the software.

► Data File Extracts

- Download File(s) of Accounts Payable Capital Invoice Details (daily transaction detail)
- Download File(s) of General Ledger Capital Activity (monthly journal entries)
- Download File(s) of Purchase Order Capital Activity (daily transaction detail – ONLY if NOT intending to use the Axiom Capital Tracking purchase request features)

Data collection file layouts - data feeds

The following section includes the layout descriptions for the database files.

► Accounts Payable

File Layout

- If import will be automated via Scheduler:
 - File name should begin with “AP_KHALL” (same file name each time file is run/saved)
 - File should be placed in folder accessible to the Scheduler. If system is in KH EPM Cloud, then the Cloud Integration Service must be installed.
- If import will be run manually file name should be “AP_YYMMDD”. Example: AP_150301. (Each file should have a unique file name)

Import from Capital Tracking to Source System

Purchase request data can be extracted from Capital Tracking to import into the client purchasing system which will reduce duplicate data entry by purchasing staff. The extract of data from Capital Tracking can be customized to meet the file specifications of the client purchasing system.

If you would like to utilize this feature, please provide a file layout definition and sample import file format to your implementation consultant.
