Axiom Clinical Analytics April 29th, 2021 Data Release Notes

On April 29th, 2021, Syntellis released new data to its Axiom Clinical Analytics Software. The purpose of this communication is to make clients aware of these updates.

Annual 2019 MedPAR Data

This is an annual update and all Medicare benchmarks downloaded after today will be based on 2019 MedPAR data.

October 2018 – September 2019 CMS Hospital Compare Data

This update includes October 2018 – September 2019. All benchmark data moving forward on Peak will use data from this time period for the following measures types:
- Core Measures
- Patient Satisfaction Data (HCAHPS)

To load these new benchmarks into your Axiom Clinical Analytics environment or if you have any questions, please contact us at peaksupport@syntellis.com.
